ONE-PASS CHILLER

APPLICATIONS
- Photo Developing
- Reverse Osmosis
- Ingredient Make-up
- Ice Machines
- Poultry Cooling
- Spray Washes
- Bottling
- Beverages
- Dispensers
- Eye Wash Water
- Pharmaceuticals
- Boiler Feed Samples

FEATURES
- Energy Saving Design
  Unlike most process chillers, compressor runs only as needed. Storage design provides close temperature control and safety from freeze-up without constant operation.
- Complete Temperature Control
  Temperature adjustable within a range of 40°F to 90°F [5°C to 32°C] and will hold temperature within ±1.5°F of setting.
- Welded Stainless Steel Cooling Tank
  Coolant sealed from the atmosphere, eliminates bacterial build-up and internal corrosion.
- Uses HFC Refrigerant
  Eliminates use of ozone-depleting refrigerant as per Montreal Protocol.
- Unlimited Options
  Design the perfect cooling system for any application. Over 50 options to meet almost any special need. Refer to Bulletin O & A.

MODEL: PC-75-7

DESCRIPTION
A completely packaged liquid chiller designed for applications where the liquid to be cooled passes through the chiller only once before either being added as an ingredient to a product or fouled by the product it is cooling. It is most important that a one-pass chiller be able to chill liquids at high and low flow rates without significant pressure drop or danger of freeze up, and yet have close, accurate temperature control.

Filtrine PC chillers are specifically designed for one-pass cooling. A high transfer immersion coil evaporator supplies maximum capacity at any flow rate with no pressure drop. Storage tank design permits close temperature control without short-cycling.

SPECIFICATIONS

COOLING CAPACITY
- BTU/HR: 7,600
- Watts: 2,227

Rating Conditions
- Coolant Discharge Temperature: 68°F [20°C]
- Ambient Temperature: 90°F [32°C]
- Flow rate: 2 gpm [7.6 lpm]

COMPRRESSOR HP: 3/4

Lifetime lubricated, welded hermetic type supplied with high/low pressure stat, anti-migration solenoid valve, thermostatic expansion valve, refrigerant sight glass and dehydrator.

STANDARD CONDENSERS [Designated by suffix]
- A Fan cooled condenser for indoor installation.
- W Water cooled condenser for hookup to city or tower water

COOLING TANK & EVAPORATOR
- Capacity: 8 gal [30 ltr]
- Welded stainless steel shell and immersion coil evaporator. Tank tested at 250# for 125# working pressure. Supplied with liquid level gauge and insulated with closed cell thermoplastic with an R factor of 3.7 and enclosed in rust-proof steel jacket.

THERMOSTAT: Adjustable Range: 40°F to 90°F [5°C to 32°C]
- Temperature Stability: ±1.5°F [1°C]

CABINET: Enameled aluminum panels with stainless steel corner legs and top. Panels removable for access to all components.

SUPPLY POWER:
- 115/60/1 or 230/60/1
- FLA Amps Maximum: 16 or 8

PLUMBING CONNECTIONS IN & OUT: 1/2" [13 mm] FPT

SHIPPING WEIGHT: 150 lbs [68 kg]
STANDARD MODELS: Suffix -A and -W

LEGEND

1. Temperature Control
2. Coolant Make Up
3. Coolant Discharge
4. On/Off Switch
5. Power Cord

NOTE: Chiller dimensions and shipping wts. may vary depending on options. All information given on this bulletin is for general use only. Confirm specifications with factory for your specific requirement.

NOTE: Drawing is a not-to-scale composite of various models to demonstrate plumbing locations. Confirm footprint with factory.

VENTILATION PANELS
Standard models — air intake at RIGHT, air discharge at REAR on -A models. Manufacturer recommends 12 inch minimum clear space opposite all ventilation panels.

REMOVABLE SERVICE PANELS
Front & rear on all models. Manufacturer recommends 16 inch clearance at LEFT END and 22 inch clearance at FRONT for service.
