- One-piece cover plate with no seams or exposed edges
- No plastic parts
- 100% made in the USA
- Manufactured with lead-free materials
- Integral drain for ease of cleaning
- Tamper-proof splash guard welded to cover plate
- Sleek, low maintenance modern design
- Matching cover plate finishes including unlimited powder coat colors
- Options include sensor activation, bottle counters, finishes, and much more...

Recommended Add-ons

Chiller

Equip your fountain with a Filtrine point-of-use or remote chiller to cool your drinking water. We can help you select the most economical chiller model to fit your demand.

Purifier

Ensure that your drinking water is of the highest quality by adding a Filtrine Taste Master® purifier cabinet underneath the fountain or a remote purification system serving all fountains in the building.

Digital display of approximate number of bottles saved through fountain usage

Note: Only available with sensor activation

Other Bottle Filling Station Models:

Purifier Model B103-TM

Ensure that your drinking water is of the highest quality by adding a Filtrine Taste Master[®] purifier to the bottle filling station. The 0.5 micron carbon block within the purifier removes lead, particulates, cysts, chlorine, organic odors and tastes.

Cup Dispensers Models B103-C2 & -CD2

Model B103-C2 water bottle fillers are equipped with dual cup dispensers (bottom loading) and hold approximately 100 standard paper cups. For convenient cup disposal, specify Filtrine's B103-CD2 models that come with a cup disposal bin.

Water Heater Model B103-C2-HC

Add a built-in "instant" water heater for hot beverages on demand. Our Model B103-C2-HC is the industry's only in-wall bottle filling station that dispenses both regular and hot drinking water.

Water Chiller Model FCC-B103

Equip your fountain with a Filtrine point-of-use or remote chiller to cool your drinking water. We can help you select the most economical chiller model to fit your demand.

Combination Model B103-107

Combine two of our most popular water dispensers in an all-in-one space-saving unit. Give users the option of filling a water bottle or drinking directly from a fountain.

B103 Installation Drawing

Mounting Details (Front)

Approximate Rough-In Dimensions (hatched, left)

Model	Height	Width	Depth
Standard	25"	8 3/4"	4"

All views shown are for typical installation of B103. Views, dimensions and diagrams may change for specific installation requirements.

Exploded On-Wall Installation View of B103 Filling Station

Typical Assembly Instructions (Always Install Per Local Code)

1. Cut rough opening for filling station as shown above.
2. Install blocking as required to fasten the unit high and low on both sides.
3. Run supply water lines to the top of the opening for 1/4" FPT connection to stop valve.
4. Run drain piping to bottom side of opening for 1 1/2" slip coupling connection to the drain elbow.
5. Remove cover plate from filling station with straight screw driver.
6. Install the filling station fixture with 3/16" lag screws to support blocking.
7. Connect drain to trap provided in field and slip coupling provided by factory.
8. Connect water to 1/4" FPT connection at top of fixture. Use plumber's tape and crescent wrench to insure all connections are tight.
9. Turn stop valve to "on" position and test water flow from the filler valve. Water should fill a 12oz bottle in 15 seconds or less. Adjust flow at regulator if required with straight screw driver.
10. Reinstall cover plate to the filling station with [4] Jackman (provided by factory) screws on the side.

Typical Drain Plumbing Detail (In-Wall Plumbing Provided By Others, Install Per Local Code)
