Model	Height	Width	
Standard Panel	23"	31"	

All views shown are for typical installation of Model FCC-90-HL. Views, dimensions and diagrams may change for specific installation requirements.

- Cut fountain rough openings per install requirements (rough opening example shown above) and install blocking or fixture carriers as required to support the drinking fountain mounting plate and chiller cabinet in a minimum 13" deep wall.
- 2. Cut a separate rough opening extending below the fountain mounting plate, for the chiller cabinet (table top-right).
- 3. Run drain piping to center of openings on mounting plate (dimensioned above), and install drain trap(s) in wall per local code.
- 4. Run supply water line to mounted Taste Master ® filter housing.
- 5. If optional vandal bottle filler is inlcuded with order, attach piping assembly provided by Filtrine to the back side of the mounting plate with flare connection.
- 6. Fasten mounting plate to mounting surface over rough opening with  $\frac{5}{16}$ " countersunk lag bolts with bottom of plate 26" above the floor to meet ADA fountain height requirement of 34  $\frac{7}{4}$ " to the bubbler spout.
- 7. Install chiller cabinet in rough opening below the mounting plate using  $\frac{3}{16}$ " holes in the side flange of the cabinet. Chiller cabinet should be located approx.  $\frac{1}{2}$ " below and centered with the mounting plate above.
- 8. Install cover plate over mounting plate, and secure each fountain with included bolts and slide vandal proof bottle filler arm (if ordered) over the horizontal tongue protruding from the mounting plate and fasten arm with set screws pushing slightly against the cover plate.
- 9. Connect drain line to slip coupling at each fountain and connect supply lines to chiller, purifier and fountains.
