

Pedestal Fountain Guide

Filtrine offers a wide variety of pedestal drinking fountains for indoor or outdoor installations, available in bronze, stainless steel, or cast aluminum

Model 131-CP

Why Specify Filtrine Pedestal Fountains

100% metallic waterways for improved product quality and longevity

Architecturally designed fountains include continuous seams and no visible welds or screw heads

Chiller/purifier units offer superior cooling capabilities, while providing excess storage for additional water during peak demand

1/4" steel mounting plates to keep the fountains secured and stable

All fountains include the Filtrine signature "integral drain" for ease of cleaning and increased durability

All Filtrine fountains can be made vandal proof

What Sets Filtrine Apart

- Family-owned, with over 100 years of experience as a leader in the drinking water industry
- 100% made in the US with no less than 75% US components
- Fountains and bottle filling stations are constructed from 14 and 16 ga. stainless steel or bronze
- Most durable equipment in the industry, outlasting the buildings they were installed in
- Unlimited finish options to match your building's decor

Model 131-CP

The Story Behind Filtrine's Latest Innovation, a Historic Style Bottle Filling Station

In response to an invitation to display Filtrine's capabilities at local event, Filtrine designed a fixture that would complement the surrounding architectural features and buildings in its hometown's Central Square, while promoting the use of refillable water bottles.

After looking at old photos from the 1800s, Filtrine engineers intrigued by the antique "fire call boxes" that once dotted the downtown landscape, partnered with Alloy Castings, a family-owned Massachusetts business. Alloy, who specializes in aluminum castings from 1.0 oz. to 1000 lbs., used traditional sand casting methods and no-bake molds to create the base (see photo on right).

This one-of-a-kind vandal proof dual bottle filling station features energy-saving LED lights (optional) and a Filtrine Taste Master® drinking water purifier. The base is painted in shiny black fingerprint resistant paint and is available in other colors upon special request.

The almost invisible access panel in the pedestal makes for easy maintenance. The model also includes the top mounted call box style light with a sandblasted white, heat resistant globe and cage guard. Sensor activation, bottle counter and freeze proof control options available, consult the factory.

Other Pedestal Fountain Models

These versatile durable drinking water fountains can be installed either outdoors or indoors. The elegant and simple designs compliment parks or public gardens, or high traffic areas such as malls or airline terminals.

Filtrine Craftsmanship

All of Filtrine’s drinking water dispensers and chillers are made in the US by highly trained production staff. They have years of experience, take pride in their work, and are dedicated to building equipment designed to their customers’ specifications.

Filtrine’s drinking water equipment has been installed in the White House, the United Nations Building, National Gallery of Art, Apple flagship stores and in thousands of other fine public and commercial buildings around the world.

Filtrine’s drinking water systems (which include drinking fountains, bottle filling stations, chillers, purifiers, filters and sterilizers) are the benchmark for the industry and are specified for the best projects around the globe, often outlasting the buildings they were installed in.

Warranty

All of Filtrine’s products are covered by warranty to be free from defects in material and workmanship for 12 months after installation, or 15 months after shipping, whichever comes first.

Filtrine drinking water equipment can be found in all 50 states across the USA, and over 20 countries on six different continents. From private offices to hospitals, libraries, schools and public monuments, Filtrine products are made to suit your needs, whether “standard” or customized!
