

# RECIRCULATING LOOP CHILLER

#### APPLICATIONS

Jacket Cooling Lasers Induction Heaters Machine Tools Welders MRI Equipment **CAT Scans** 

Computers **Power Supplies** Vacuum Ovens Injection Molding Plasma Spraying **Linear Accelerators Electron Microscopes** 

### **FEATURES**

OPTIONAL STAINLESS STEEL EXTERIOR

## **ENERGY SAVING DESIGN**

Unlike most process chillers, compressor runs only as needed. Storage design provides close temperature control and safety from freeze-up without constant operation.

## COMPLETE TEMPERATURE CONTROL

Temperature adjustable within a range of 40°F to 90°F [4.4°C to 32°C] and will hold temperature within ±1.5°F  $[0.8^{\circ}C]$  of setting.  $[\pm 0.5^{\circ}F/0.3^{\circ}C$  optional]

## WELDED STAINLESS STEEL COOLING TANK

Recirculates clean coolant sealed from the atmosphere, eliminates bacterial build-up and internal corrosion.

### **USES REFRIGERANT R-134a**

Eliminates use of ozone-depleting refrigerant as per Montreal Protocol.

# **UNLIMITED OPTIONS**

Design the perfect cooling system for any application. Over 50 options to meet almost any special need. See bulletin O & A.

# MODEL...... PCP or POC-100-10 **DESCRIPTION**

Recirculating chillers recirculate a clean coolant at constant temperature and pressure to increase the stability and consistency of water cooled machines and instruments. Air cooled chillers eliminate the use of tap water and prevent clogging and corrosion of small diameter heat exchangers due to rust and scale build-up.

#### **PCP - CLOSED LOOP CHILLERS**

Use a storage type cooling tank, with immersion coil evaporator, to provide close temperature control of recirculating coolants. The tank is sealed to prevent coolant evaporation and fouling, and supplied with a liquid level gauge, fill port and clean out. The pump recirculates coolant at constant pressure and flow.

#### **POC - OPEN LOOP CHILLERS**

Pump liquid from an open tank or sump, through the chiller and back to the sump. An adjustable thermostat senses the make up liquid temperature, cycling the chiller to insure constant temperature in the sump.

### **SPECIFICATIONS**

COOLING CAPACIT	
( COOLING APACIA	Y٠

Btu/Hr Watts	•
Rating Conditions	,
Coolant Discharge Temperature	68°F [20°C]
Ambient Temperature	90°F [32°C]
COMPRESSOR HP	1
Lifetime lubricated, welded hermetic type supplied with	condenser as

specified [see below], charging port, expansion valve and dehydrator.

## STANDARD CONDENSERS [Designated by suffix]

- —А Fan cooled condenser inside chiller housing.
- Water cooled condenser for hookup to city or tower water -w
- —A-WP Self-contained air cooled condenser; complete unit made weather-resistant for outdoor installation.

COOLING TANK & EVAPORATOR CAPACITY ......12 gal. [46 liters] Welded all stainless steel shell and immersion coil evaporator. Tank tested for 125# working pressure. Insulated with closed cell thermoelastomer with an R factor of 3.7 and enclosed in a rust-proofed steel jacket.

PUMP MOTOR HP.......1/3 Capacity......8 GPM @ 15 PSI [ 30 LPM @ 1 bar]

All bronze centrifugal pump mounted on rubber pads over a stainless steel condensation tray. All piping and fittings plastic, copper, or brass and insulated with closed cell thermoelastomer with an R factor of 3.7. Supplied with manual on/off switch.

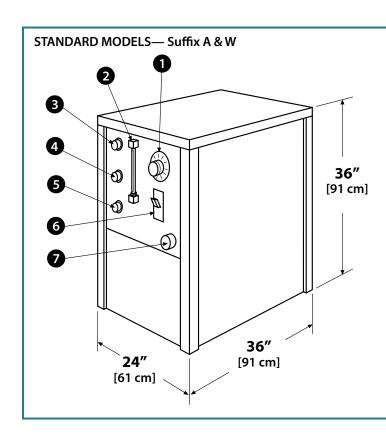

THERMOSTAT ADJUSTABLE RANGE.......40° to 90°F [5° to 32°C] Temperature Stability .....±1.5°F [0.8°C]

CABINET: Enameled aluminum panels with stainless steel corner legs and top. Panels removable for access to all components.

FLA AMPS MAXIMUM ......18 or 9 PLUMBING CONNECTIONS IN & OUT ...... 1/2" FPT [13 mm] 

SUPPLY POWER ......115 or 230/60/1

### **LEGEND**

- Temperature Control
- Level Gauge
- Fill Port
- **Coolant Return**
- 5. Coolant Discharge
- On/Off Switch
- **Electrical Connection**

Chiller dimensions and shipping wts. may vary depending on options. All information given on this bulletin is for general use only. Confirm specifications with factory for your specific requirement.

# **EXPLANATORY NOTES**

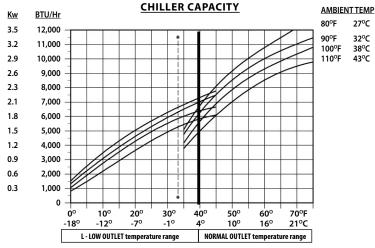

**VENTILATION PANELS:** Standard models — air intake at right end and air discharge at rear on A & WP models. Allow 12" [30 cm] clearance at these ends.

**REMOVABLE SERVICE PANELS:** Front & rear on all models.

SERVICE ROOM: Allow 16" [40 cm] at left end and 22" [55 cm] at front for service.

**INSTALLATION & SERVICE:** Arranging for installation, start-up and service is the responsibility of the purchaser.

**WARRANTY:** All parts are covered F.O.B. factory for 15 months from date of shipment.

<sup>\*</sup> For outlet temperatures below 34°F - use appropriate antifreeze

PUMP CAPACITY										
	GPM @ PRESSURE SHOWN
